All of Us Researcher Publication, Presentation, and Poster Checklist

For any paper, presentation, poster, or other product that uses data from an *All of Us* analytical platform, I confirm that I have abided by the terms of all of the following policies:

All of Us Data User Code of Conduct

In the conduct of my research I have complied with **all** provisions of the *All of Us* Data User Code of Conduct. For the purposes of publication, presentation, or a scientific poster, I confirm that:

- ☐ I have **not** taken screenshots of or attempted in any way to copy, download, or otherwise remove any participant-level data, including synthetic data generated using participant data, from any *All of Us* analytical platform.
- ☐ I have **not** published or otherwise distributed any participant-level data from any *All of Us* analytical platform.

TIP: If you are planning to export scripts to a GitHub or other online repository, remember to clear all participant-level data in your code, scripts, or other documentation, including outputs embedded in the code. Searching for "person_id" in your tables can help you identify whether you have included participant-level data, but removing the "person_id" column does **not** make a table compliant with the prohibition on sharing participant-level data.

All of Us Data and Statistics Dissemination Policy

- ☐ I have **not** included participant and/or incident counts of fewer than 20.
- ☐ I have **not** included data from which participant and/or incident counts of fewer than 20 **can be derived or calculated** with mathematical formulas or percentages.

or

- ☐ I have requested and received an **exception from the *All of Us* Resource Access Board** to display participant and/or incident counts of fewer than 20. Requests must be submitted and approved through the *All of Us* Data and Statistics Dissemination Policy Exception Request Form **before** the product is submitted for publication or presentation.

All of Us Policy on Stigmatizing Research

- ☐ I have taken adequate steps to ensure that this study will not be stigmatizing to any individuals, groups, or communities, in accordance with the *All of Us* Policy on Stigmatizing Research.

All of Us Policy on the Ethical Conduct of Research

- ☐ I have performed this study in a manner that aligns with the ethical principles set forth in the *All of Us* Policy on the Ethical Conduct of Research.

All of Us Researcher Publication, Presentation, and Poster Checklist

(Continued)

All of Us Policy on Respectful Research Involving American Indian and Alaska Native (AI/AN) populations

If I am including American Indian and/or Alaska Native populations in my research: I acknowledge the scientific community's past transgressions against AI/AN populations and promise to conduct research that recognizes Tribal sovereignty and is respectful of Tribal cultures, knowledge, and values. Encompassed in this promise is my pledge to take appropriate measures to avoid further harms, including stigmatization. As such, I have complied with all aspects of the *All of Us* Policy on Respectful Research Involving American Indian and Alaska Native Populations. As it pertains to publications, presentations, or posters related to my research:

- ☐ I have used respectful and appropriate language and preferred terminology when discussing AI/AN individuals, groups, and communities and all information related thereto.
- ☐ I have **not** conflated political, social, and biological concepts, particularly in evaluating participants' genetic similarity to populations with inferred Indigenous American genetic ancestry and drawing conclusions based on such evaluation.
- ☐ I have **not** attempted to re-identify AI/AN individuals or groups or attempted to re-identify the Tribe(s) to which such individuals or groups belong or the region from which they come.
- ☐ I understand that my research, including any related publications, presentations, or posters, may be subject to additional scrutiny by the *All of Us* Research Program, the NIH Tribal Advisory Committee, and other relevant oversight bodies.

All of Us Publication and Presentation Policy

- ☐ I have submitted the mandatory *All of Us* Publication and Presentation Reporting Form **at least two weeks before** the publication or presentation date.
- ☐ I have included a statement that acknowledges the program and its participants, such as:

  "We gratefully acknowledge *All of Us* participants for their contributions, without whom this research would not have been possible. We also thank the National Institutes of Health's *All of Us* Research Program for making available the participant data [and/or samples and/or cohort] examined in this study."

- ☐ I have included a data availability or data access statement that cites the Researcher Workbench, the *All of Us* dataset version used, such as:

  "This study used data from the *All of Us* Research Program's [Registered/Controlled] Tier Dataset [version number], available to authorized users on the Researcher Workbench."

- ☐ **For peer-reviewed manuscripts only:** I have submitted an electronic version of the final, peer-reviewed manuscript to PubMed Central **immediately after acceptance** for publication and confirmed that the manuscript will be made publicly available after publication **without an embargo period.**

- ☐ **I understand that failure to comply with these policies may result in termination of my *All of Us* Research Program account and/or other sanctions, as outlined in the Data User Code of Conduct.**

If you have questions about any of these policies, please visit the User Support Hub or email support@researchallofus.org.
